

SchoolID

A cloud-based, globally, unique user account.

Learn more.

AUTHORISATION SERVICE AND CLOUD-BASED USER ACCOUNT

SchoolID is a cloud-based, globally unique user account and IDP (identity provider) in one. It enables a safe and simple login method to various school related systems and services. It is based on the same principles as the Swedish BankID, and makes use of two-factor authentication.

SchoolID is aimed at all roles in the school – students, teachers, and parents. The proprietor of a SchoolID identifies themselves directly in all connected services regarding themselves or their child using SchoolID, and can easily manage traditional services related to the school, as well as reach all of IST's applications and services safely.

SchoolID has a variety of login methods that are adapted to different needs and security requirements.

Examples of login methods supported by SchoolID include:

- ✓ Username/e-mail and password
- ✓ SMS code
- ✓ BankID - mobile and on a unit
- ✓ Mobile SchoolID (app)
- ✓ Yubikey (or other similar hardware)

SchoolID – an account for everyone

In addition to school related services, SchoolID also functions as an account for additional services linked to the family. A SchoolID is uniquely linked to your person, which means that it can give access to all services or systems that use SchoolID. This may include sports and leisure activities, the cultural school or other family-related services.

Students and guardians

- ✓ One account for all school and family related services.
- ✓ Keeps all family events connected.

Associations/After school activities

- ✓ A simple, cloud-based solution.
- ✓ Keeps all family events connected.

Municipalities/School organisations

- ✓ A simple, secure, cloud-based solution adapted for schools.

Service providers

- ✓ Focus on content instead of technology.
- ✓ Access to target groups and data.

IST SCHOOLID is a part of our complete **IST Everyday** offer, which now is available at many schools around the country.
