# NO MORE CRUMPLED PAPER SLIPS

IST Consent is a cloud-based solution to easily manage parental consent. The service makes it easier for municipalities and schools to collect information from parents, who can easily give consent on their children's behalf digitally. Of course, the service is GDPR compliant and offers full data security.

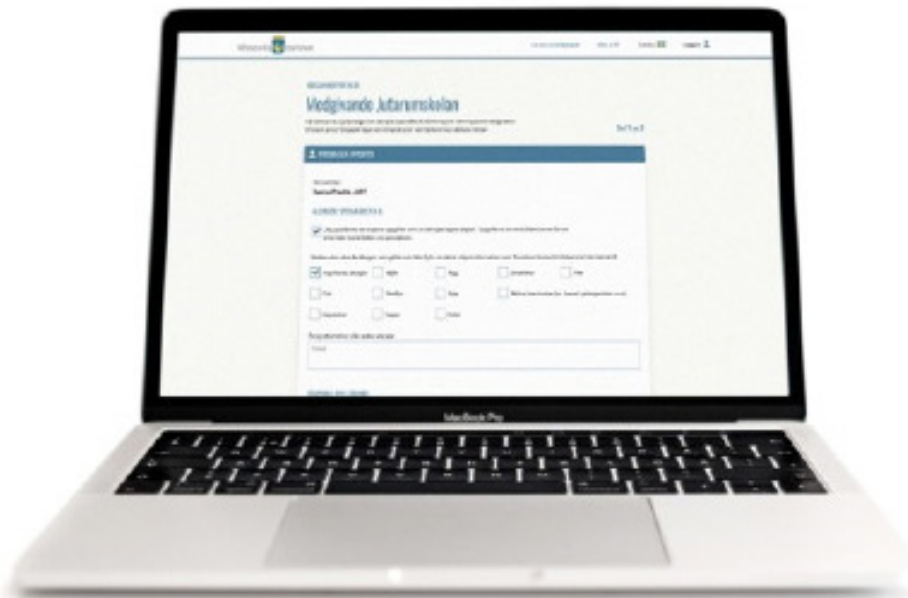

# How IST Consent works for different roles

## Administrators & Teachers

- ✓ Easy to create different forms and distribute them to parents and guardians digitally.
- ✓ Provides a clear overview of all given consents.
- ✓ Possibility to control which roles within the school that can access information, and which information they can see. For example, only school kitchen staff can see allergies and special diets.
- ✓ Full data security and GDPR compliance.

## Parents & Guardians

- ✓ A completely digital management system for issues that require consent - no more crumpled paper forms in your child's backpack.
- ✓ Simple consent management for school photos, diet information, trips, and more.
- ✓ Possibility to adjust/change the consent.
- ✓ Personal data is handled safely.

IST CONSENT is a part of our complete **IST Everyday** offer, which now is available at many schools around the country.
